

ACTS

Who we are:

Founded in 1995, ACTS are industry leaders in occupational health monitoring equipment, clinical software, training and consumables.

Over the many years of providing leading products and training, our team has evolved to include industry experts in training, product sales, technical deployment and support.

At ACTS we believe the success of any company is based on the training of its employees.

Our training is based on organized well-structured hands on practical and theoretical training techniques and material accredited by the Department of Labour.

Our focus is to supply class leading Medical products and Software backed up by comprehensive training.

By focusing on these key elements ACTS have made considerable contributions within occupational health in both industry and the Mining Sector of South Africa.

HEALTH+ SAFETY AT WORK

What we do:

ACTS aim to become the complete **Audiometry, Spirometry and Vision** service provider for our clients.

By providing leading training in each field as well as refresher courses, we ensure that all our training is continuously meeting all relevant legislative industry standards.

Our training is complemented with the addition of supplies in **Audiometers, Audiometric booths, Spirometers, Vision screeners, Occupational Health Clinic Software and Consumables.**

Our training focuses on the key sensory metrics:

- Audiometry
- Vision Screening
- Spirometry

Products & Services:

Diagnostic Audiometers

We offer a complete range of INVENTIS Diagnostic Audiological equipment. Our product range comprises from Basic entry level Diagnostic Equipment to the more advanced Clinical models including Video VRA, Video Otoscopy, Free Field systems, Tympanometers, Hybrid Audio/Tymp units and Hearing Aid Testing systems.

Screening Audiometers

Our comprehensive range of Screening audiometers caters for both small and larger clinics. Depending on the size of your clinic we supply single testing units as well as multi testing systems enabling the user to test multiple patients simultaneously. Our audiometers are coupled to the ACTS INTEGRATED SOFTWARE system ensuring that all hearing tests results are stored to a reliable database.

Services

- Periodic Medical Device Calibrations performed by qualified technicians and procedures followed as stipulated by local SANS 10154/10182 and international IEC 645 standards.
- Calibration Equipment used traceable to accredit a SANAS laboratory.
- Service and Repairs

ACTS is a Trusted Local SA Supplier that believes that we can make a change by uplifting communities through Training and Skill Development. All of our products supplied complies with both local and International Standards.

Audiometric Booths

AVX 1 & AVX 2 Audiometric Sound booths are manufactured in an ISO certified manufacturing facility making use of only the highest standard of materials. They offer maximum attenuation ensuring that tests are conducted in compliance with SANS 10182.

Clinic Software

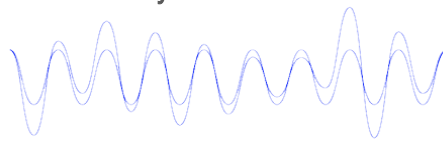

ACTS INTEGRATED SOFTWARE

- Audio
- Vision
- Spiro

OCCUPATIONAL HEALTH SOFTWARE MODULE

- Primary measurements and Vital Signs
- Physical Examinations
